

# SYED FOUZAN

AI Engineer · Full-Stack Developer · LLM & Agentic AI Systems

📞 +91-8431558655 | ✉️ syedfouzaan00@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio | 📍 Bangalore, India

## PROFESSIONAL SUMMARY

AI Engineer and Full-Stack Developer with end-to-end experience shipping intelligent systems — agentic LLM pipelines, real-time computer vision, and responsive web platforms. Key outcomes: **70% reduction in analytics time**, **89% mAP object detection**, **90% gesture accuracy**. Proficient in Python, JavaScript, HTML5, CSS3, SQL, Large Language Models, Prompt Engineering, and Agentic AI. CGPA 8.11/10. Hackathon award-winner. Seeking to contribute scalable, AI-powered solutions at the intersection of engineering and intelligent systems.

## TECHNICAL SKILLS

|                 |                                                                                                                     |
|-----------------|---------------------------------------------------------------------------------------------------------------------|
| Core Languages  | Python (Advanced), JavaScript (ES6+), HTML5, CSS3, SQL, TypeScript                                                  |
| AI / LLMs       | LLMs, Prompt Engineering, Agentic AI, Google Gemini API, Hugging Face Transformers, RAG, Chain-of-Thought Reasoning |
| Computer Vision | OpenCV, MediaPipe, YOLOv8, Pose Landmark Tracking, Object Detection                                                 |
| ML / DL         | scikit-learn, TensorFlow/Keras, LSTM, Collaborative Filtering                                                       |
| Web / Frontend  | React.js, Next.js, Flask, REST APIs, Tailwind CSS                                                                   |
| Databases       | PostgreSQL, MySQL, MongoDB, Firebase, Supabase                                                                      |
| Tools           | Git, GitHub, Docker, Pandas, NumPy, Matplotlib                                                                      |

## TRAINING & DEVELOPMENT

|                                                                                                                                                                                                                                                                                                                                                                                                                                  |                    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| Developer Trainee   Dhee Coding Lab (DCL)<br>Yelahanka, Bangalore                                                                                                                                                                                                                                                                                                                                                                | Jan 2026 – Present |
| <ul style="list-style-type: none"><li>Completed structured training in <b>HTML5, CSS3, and JavaScript (ES6+)</b>, building 5+ responsive UI components and layouts as graded exercises.</li><li>Strengthened <b>core Python</b> (OOP, data structures, file I/O) through 40+ hours of hands-on exercises; applying SQL (DDL/DML, joins) to design relational schemas; advancing to React.js and Python web frameworks.</li></ul> |                    |

## EDUCATION

|                                                                                                                                                                  |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| B.E. Computer Science & Engineering — AI & ML   R.L. Jalappa Institute of Technology, VTU<br>Doddaballapur, Karnataka CGPA: 8.11 / 10 (consistent throughout)    | Nov 2022 – May 2026 |
| <ul style="list-style-type: none"><li>Coursework: Machine Learning, Deep Learning, Computer Vision, DSA, DBMS, Operating Systems, Software Engineering</li></ul> |                     |

## SELECTED PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                        |          |   |
